

Please note, due to the popularity of my service, I am unable to take on new cat sitting and new grooming customers at this time.

Please consult www.localpetsitters.com for an insured pet sitter near you in the Albany/Troy, New York area.

My care includes:

- insulin injections
- subcutaneous fluids
- other medications (pills, liquid, subcutaneous injections)
- litterbox help and understanding for cats with cerebellar hypoplasia and other conditions

And yes, I take care of healthy cats as well!

I can also feed your managed feral colony while you're away!

I can bring in your mail, newspapers, garbage/recycling bins, adjust window shades, curtains or blinds, and water plants. I clean litter boxes and take food and litter trash out.

Of course, I play with your cats, pet them, brush them, talk with them, and relax with them. I spend time at your home with your cats.
